COMMENTS TO AUTHORS

This manuscript describes the discussion of the necessity of routine drainage after pancreaticoduodenectomy. However, there are several queries as follows; 1. You should change the term “intro-abdominal” to “intra-abdominal” in line 31 page 3 of Introduction. 2. How about the comparison between pancreaticojejunostomy and pancreaticogastrostomy in the anastomosis regarding pancreatic fistula? 3. What do you think about the difference between the open drainage and closed drainage after pancreaticoduodenectomy? 4. Is negative pressure better or worse for drainage after pancreaticoduodenectomy? 5. How about the difference of the insertion point of drainage tube and the number of drainage tube? 6. What do you think the RCT in details?
