COMMENTS TO AUTHORS

Well written animal-model based study giving the insights of intestinal dysfunction in intestinal obstruction. some minor clarifications and corrections -- 1. The abbreviations (HPLC etc) to be expanded when first used. 2. The results are too long. Can be presently briefly. 3. Some minor spelling mistakes (title page) 4. Too many subheadings in the text. To be checked if permissible for journal format. 4. References to be put according to journal format
