<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> No records	<input type="checkbox"/> Major revision

COMMENTS TO AUTHORS

1, diabetes is not the major topic of this paper; it is not proper to present this data set in the results. 2, all the immunohistochemistry images do not have staining controls; please add. 3, the authors claimed that they did semi-quantitative analysis of the immunohistochemistry results; please describe the analytic methods in detail. 4, more experiments are to be done; please add real time RT-PCR and Western blotting results of GRP78 and caspase 12. 5, the EM images show no differences each other; you may replace them with proper ones.

COMMENTS TO AUTHORS

1. Novelty can be shown in your paper, however, you should improve your presentation skills to reorganize your ideas. 2. Overall the research had been done scientifically. In the methods Monitoring of blood glucose concentration and weight, you mentioned measured at the 3rd day(s) and the first week, why was the two group different?
