COMMENTS TO AUTHORS

In this paper, Authors reported a case of tubulopapillary adenoma of the gallbladder accompanied by bile duct tumor thrombus. Although the authors well summarized the topic, there are several unresolved issues in the current manuscript. Major Points 1. Add the figures of immunological staining. 2. Much of the initial commentary is background, but really should only be summarized in the discussed in greater depth in the context of the clinical evidence concerning surgical intervention. I would direct you to the article by Albores-Saavedra J in the Hum Pathol. 2012 Sep;43(9):1506-13 on the subject.
