COMMENTS TO AUTHORS

Very well written and clear short overview of the relation between obesity-related metabolic abnormalities and colorectal cancer. No significant comments are to be made according to my opinion.

COMMENTS TO AUTHORS

This is a well written paper regarding the prevention of colorectal cancer by targeting obesity-associated parameters, as obesity has been linked to this type of cancer. Certain specific changes in the text could make the manuscript more precise and proper in terms of structure. 1. please change the running title as the term "obesity-related colorectal cancer" is not accurate, as we are not sure that only obesity is responsible for this type of cancer 2. Please use "lipid lowering therapy/drugs/treatment" instead of "anti-dyslipidemia medicines" 3. Page 5, line 18: omit "and medicine...dyslipidemia". 4. Page 6, lines 20-22: please add a reference in this sentence. 5. Page 7, lines 16-18: please check if this sentence is correct. 6. Page 7, line 19: omit the word "pathophysiological". 7. Page 8, lines 14-16: please clarify (e.g. give more data) for this statement. 8. Page 9, line 15: please explain what this mouse model represents. 9. Page 11, lines 19-20: please add a reference at the end of this sentence. 10. Page 11, line 22: please change the term "lipid-restoring".
