COMMENTS TO AUTHORS

The experiment appears to have been performed using proper design. It is still unclear to me why the difference in 25-OH Vitamin D is not a confounding variable. Will this report all for the use of glucose-induced suppression of CTX-I to measure the severity of Crohn's disease. Perhaps the authors could comment on this.

COMMENTS TO AUTHORS

This is a good study examining a poorly studied section of IBD. There is one minor change. In table 1 the trade name lomotil should include(diphenoxylate and atropine)
