## COMMENTS TO AUTHORS

This case report is well written and included imagings, and pathology. EUS has been considered a valuable tool for the diagnosis and staging of gastric cancer. The findings from this case report that showed the valuable of an EGD and EUS might not add a significant new/unique knowledge.

### COMMENTS TO AUTHORS

Interesting and well written case report. No great new news as the approach to unresolving ulcer is operation. Nice pictures including CT and the pathology that is very imformative.
