COMMENTS TO AUTHORS

The role of *Helicobacter pylori* in gastric MALT lymphomas Pereira M-I and Medeiros JA

GENERAL COMMENTS The authors present an extensive review of the literature regarding MALT lymphomas and the role of *Helicobacter* infection. The review is well written.

SPECIFIC COMMENTS There is little to comment on this paper. The language is almost flawless, the structure of the paper good and the references comprehensive. An improvement to the readability would be to add some summarizing tables for some of the chapters.

COMMENTS TO AUTHORS

This is a well-written review paper for H. pylori infection in gastric MALT lymphoma. However, it is better to understand easily if some Tables or Figures are included .
