COMMENTS TO AUTHORS

This study aims to investigate the association between adipokines concentration and HOMA-IR in patients with HCV. There are some concerns precluded my recommendation of nice comments. First, this is not a novel idea. Second, the aims, the data of the results, and the conclusion of this manuscript is inconsistent. Third, the sample size is too small to clarify a definite conclusion. Fourth, there are many mistakes about the writing format and grammar.

COMMENTS TO AUTHORS

Table 1: Please add BMI of HCV patients and healthy subjects. Was there any significant difference between the two groups.

COMMENTS TO AUTHORS

I think this manuscript may be accepted provided that a power calculation is given based on the sample size.
