COMMENTS TO AUTHORS

Title: Symptomatic multinodular splenic hamartoma suspected as metastatic tumor preoperation: A case report. Authors indicate a rare surgical case of symptomatic multinodular splenic hamartoma. (1) Second and third paragraph in Discussion are rambling talk as the case report. The author should change these paragraphs more compact and brief. (2) Title should be changed to "Symptomatic multinodular splenic hamartoma preoperatively suspected as metastatic tumor: A case report.". (3) In Abstract, Case report and Discussion, "CT pain scan" should be changed to "CT plain scan". (4) In Abstract, "The features of the images being in accord with metastases." should be changed to correct sentence.
