COMMENTS TO AUTHORS

This is a very useful review of the use of older donors in liver replacement. The manuscript is well written but there are a few grammatical errors that need correcting and the manuscript would benefit from proof reading by somebody with English as a first language. The authors might consider changing the word mandatory to suggested in the final paragraph

COMMENTS TO AUTHORS

This paper describes the liver transplantation using old liver grafts. Although the paper is well written, it requires major revision as described below. 1 Through the paper, ageing is used. Ageing should be aging. 2 The paper is redundant. It can be shortened.
