		<input type="checkbox"/> No records	<input type="checkbox"/> Major revision

COMMENTS TO AUTHORS

This is an very interesting manuscript about the roles of moxibustion in regulating interleukin-8, interleukin-10, Toll-like receptor 9 and nuclear factor Kappa-B cells P65 in ulcerative colitis. The paper is very well written. Some minor revisions needed. 1 The title can be re-considered that more reflect the content. 2 The results are well discussed. 3 More clear figures should be provided for publication.
