COMMENTS TO AUTHORS

Congratulations on this good manuscript. Could be published after few changes. All the BDI reported here are very severe, I'm curious to know how these injuries occurred

COMMENTS TO AUTHORS

Dear Authors, I think this is a very interesting manuscript. It offers to the reader a good view of the high-location bile duct injuries. There are some minor considerations to be reviewed in the original manuscript. In the attached document there are some suggestions. The causes of the bile duct lesions must be cleared.
