### COMMENTS TO AUTHORS

1) The case report is beneficial to guide the clinical doctors to diagnose and treat the upper gastrointestinal bleeding because of rare causes such as hepatocellular carcinoma invasion . 2) I suggest that the article can be published in the form of case report .

**COMMENTS TO AUTHORS**

The authors report a patient of upper GI bleeding because of HCC invasive stomach, and share the information of this rare case treatment with readers. Main comment 1. As a case report, the manuscript is too long 2. the language should be improved 3. Fig. 4 is from immunohistochemical results? How to judge the CK 8/18+, Hepar-1+, CK 20+, AFP-, CEA-, CD 34 vessel+, and CD 117- from Fig.4? Minor comments 1. the abbr. of GI in title is ok? 2. the use of abbreviation in text is not regular 3. Fig. 1 can use arrow showing the location of tumors 4. Ref.8, Ann Surg Oncol is journal? Volume and page?

# COMMENTS TO AUTHORS

The submitted manuscript concerns an usual and interesting case of upper gastrointestinal bleeding. The presented data are sufficient; however some changes and corrections have to be done. Comments 1. The Abstract has to be shortened. 2. In the Abstract, line 12, the sentence "gastric lumen ....." has to be corrected as follows : " gastric wall: a larger mass in close contact with a tumor in the left..... " 3."Gastric lumen", wherever is written in the text, has to be replaced by " invasion of the gastric wall with protrusion or exposure of the tumor or tumor mass into the lumen". 4.In the Introduction, at the end of the 1st paragraph, the word "erosive" has to be added before "gastritis". 5.In the section Case Report: a)Figures and Legends should not be included in the main text (see guidelines) b)Histological photos are of poor quality. c)Figures A and C have to be replaced by a single figure showing transmural invasion of the stomach by HCC. d)The gross examination of the surgical specimen as well as histology including immunohistochemical findings should be displayed in detail after imaging, endoscopy and surgical procedure which in turn have to be presented in a consecutive manner. e)First page, line 12, "pathology" should be replaced by "histological examination". f)First page, line 15, do the authors mean " 3 yearslater?" g)First page, line 20, "since the procedures" has to be deleted. 6.In the Discussion: a)Page 11, line 3, more information as well as references are missing b)Page 12, line 4, .... invasion of the gastric wall as a consequence of inflammation.....
