COMMENTS TO AUTHORS

My detailed comments are as follows: 1、 New references should be added to introduce the recent development of research. The case in point is a meta-analysis which suggests a protective role for H. pylori infection in the prognosis of GC (PLoS One. 2013 May 7; 8(5):e62440.) 2、 Add more evidence to clarify the relationship between HP and gastric cancer, DNA demethylation, for example. (Cancer Prev Res (Phila). 2013 Apr;6(4):263-70.)

COMMENTS TO AUTHORS

1/ References should be refreshed to show the recent results of related studies. 2/ More evidence should be added to demonstrate the mechanisms of HP-associated gastric cancer, for example the functions of virulent factors of HP. 3/ The three sections of COX-2 should be concise and clear.
