COMMENTS TO AUTHORS

Interesting manuscript, please review as per instructions: Please be cautious with abbreviations LDA? second page rephrase the data analysis section, with particular attention in the description of erosion/ulcer (consider a schematic presentation and/or figure with explanations), very useful here! ?what is the difference of non-aspirin NSAID with NSAID? most of us are used to NSAID, aspirin or other categorisation please give example of thienopyridine antiplatelet thank you for your work

COMMENTS TO AUTHORS

Interesting work, your power for the conclusion is limited, but as a hypothesis building statement, seems a worthy endeavour as a short report or letter to the editor.
