## COMMENTS TO AUTHORS

I read the manuscript "THE ROLE OF MAGNETIC RESONANCE ENTEROGRAPHY IN PATIENTS WITH IRON DEFICIENCY ANEMIA REFRACTORY TO TREATMENT: A PICTORIAL OVERVIEW OF FIFTY-THREE PATIENTS" with interest. The authors proposed that magnetic resonance enterography is a non-invasive and effective alternative for evaluating possibility of malignancies of the small intestines and may serve as a guide for a second-look endoscopy for those patients who suffer from iron deficiency anemia refractory to treatment. I believe that this manuscript is suitable for publication in World Journal of Gastroenterology. I consider this paper is acceptable but some editorial or grammatical corrections are required.
