COMMENTS TO AUTHORS

The authors are reporting a case of complete body-neck torsion of the gallbladder concluding that T2-weighted MRI images are not only helpful to confirm the diagnosis, but also in evaluating necrosis of the gallbladder wall in such situations. The report is well written with excellent documentation and demonstration of the images taken for the case. Comments to the author 1- Repetition of some sentences in the introduction and discussion 2- Page 7, paragraph 1, last sentence "mortality rate of is ..." correct 3- Page 8, Ultrasonography is written abbreviated in paragraph 3 and in full in paragraph 4. 4- Some abbreviations are mentioned without full name, please revise

COMMENTS TO AUTHORS

If possible, it would be interesting to add information about some former painful episode in the right upper quadrant # For clarity, it is advisable to write extrahepatic bile duct instead of extrahepatic duct
