COMMENTS TO AUTHORS

Solid paper describing the medicinal effects of hydroxynaphthoquinone in colitis. The topic is important, the methods used standard. Results are sound and well described, discussion adequate. The information about purity of hydroxynaphthoquinone should be added into the Material and Method section. Some improvements in English are necessary.

COMMENTS TO AUTHORS

The authors investigated the therapeutic effect of hydroxynaphthoquinone mixture in a model of ulcerative colitis and explored its underlying mechanisms. The result showed that HM could treat ulcerative colitis. The study is of clinical significance. However, some improvements in English is needed for the manuscript.
