### COMMENTS TO AUTHORS

This article is very good content. However, a mention is necessary in this connection. The perforation by Sope has many ratios operated on, and it is known to even a past report that convalescence is good even if it follows up the guidewiire perforation conservatively. You should speak what time of timing you operate in what kind of case operates what kind of case I should follow it up about in a perforation case conservatively because it is an article about the perforation.

### COMMENTS TO AUTHORS

This is an interesting study that has been presented in a clear, well-written manuscript. I have several comments and questions that may help to improve the manuscript.
