Science editor: Gou, Su-Xin

Date sent for review: 2014-02-25 08:41

Date reviewed: 2014-03-01 14:56

CLASSIFICATION	LANGUAGE EVALUATION	RECOMMENDATION	CONCLUSION
<input type="checkbox"/> Grade A (Excellent)	<input checked="" type="checkbox"/> Grade A: Priority Publishing	Google Search:	<input type="checkbox"/> Accept
<input type="checkbox"/> Grade B (Very good)	<input type="checkbox"/> Grade B: minor language polishing	<input type="checkbox"/> Existed	<input type="checkbox"/> High priority for publication
<input checked="" type="checkbox"/> Grade C (Good)	<input type="checkbox"/> Grade C: a great deal of language polishing	<input type="checkbox"/> No records	<input type="checkbox"/> Rejection
<input type="checkbox"/> Grade D (Fair)	<input type="checkbox"/> Grade D: rejected	<input type="checkbox"/> Existed	<input type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> No records	<input checked="" type="checkbox"/> Major revision

COMMENTS TO AUTHORS

Please report the demographic characteristic of the population that live in the zone of the hospital (resident, foreign origin, men/women, etc.), and if is possible with a map of the region. - In the introduction section, is necessary to report that now, the diagnosis of celiac disease, is often made not for gastrointestinal disease in first line, but because the patients can presented other diseases [i.e. affective and psychiatric disorders (Addolorato et al. Dig Dis 2008), skin diseases (Abenavoli World J Gastroenterol 2006), endocrine disorders (Robazzi et al. Clin Exp Rheumatol)]. - The patients made a structural interview. However, no information about the diet of this health subjects are reported. - Is necessary to improve the conclusion, with the discussion of the possible impact of the data reported in this paper on regard of the health policy in UAE. - Many double spaces are present in the text. - Please revise the References section an table 3, in order to present appropriately it.
