COMMENTS TO AUTHORS

Very interesting topic regarding the rare disorder namely Budd-Chiari Syndrome. The analyzed series of forty-seven patients is representative. The introduction section is clear. The methods appear adequate to carry out the study. Both the results and discussion sections are too descriptive and in my opinion these sections are too long. I would suggest to shorten the above sections deleting in the main text the same data also reported in tables. Finally I would suggest to expand the reference's section in that there are cited only 20 references. Figures and tables are representative.

COMMENTS TO AUTHORS

The subject and the results are relevant. The number of cases is significant and the methodology is appropriate to the goals. I suggest that they included a number of additional references.
