COMMENTS TO AUTHORS

In the present manuscript, the authors showed that PIK3CB may function as a novel response-predictive gene and a potential therapeutic target for locally advanced rectal cancer after 30-Gy/10-f preoperative radiotherapy. The manuscript is very well written, some minor corrections needed. 1 The language need to be revised by a native English speaker. 2 The result is interesting, but some data seems confusion. Please check the date again. 3 The text need to be edit according to the format of the journal.

ESPS Peer-review Report
Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 11915

Title: Overexpression of PIK3CB is associated with poor response to preoperative radiotherapy and might be a potential therapeutic target for locally advanced rectal adenocarcinoma

COMMENTS TO AUTHORS

This study is very interesting. Only the language need some revision.
