COMMENTS TO AUTHORS

in this review, diagnosis of biliary cause for pancreatitis is discussed, emphasizing various imaging techniques. Although I have no major criticisms, the main problem is that there is no new information provided on the topic.

COMMENTS TO AUTHORS

This review article is well written. However, it is plain and does not increase our knowledge. Minor 1. Please spell out "TUS" in abstract. 2. Delete cent in ERCP. 89% cent 3. Please explain more details of the last part in Microlithiasis If aetiology remains unidentified, especially after a second attack of idiopathic pancreatitis, genetic counselling (not necessarily genetic testing) should be considered [3]. What does this sentence mean concretely?

COMMENTS TO AUTHORS

This is a review on imaging tests for accurate diagnosis of acute biliary pancreatitis. Although it does not add substantially to our knowledge, i think this manuscript may be useful for clinicians involved in this pathology.
