### COMMENTS TO AUTHORS

I reviewed with great interest the manuscript entitled "VIDEO CAPSULE ENDOSCOPY: PERSPECTIVES OF A REVOLUTIONARY TECHNIQUE", by a team that has contributed a lot in the literature of capsule endoscopy. The major issue of the review is that it is a historical review of the existing literature, to its greater extend, while according to the title the manuscript should focus on future perspectives. I propose to the authors to shorten the existing evidence sections and enrich the perspective sections with tables that will summarize the future of this technology. Furthermore, inclusion of tables presenting e.g. indications, bowel preparation schemes, meta-analysis results, etc. will make the manuscript more reader friendly and will illustrate the existing evidence more clearly.

### COMMENTS TO AUTHORS

Review article on capsule endoscopy. While interesting and quite detailed, it lacks focus at times and needs more GI depth. No conclusion, just left off without final wrap up.

### COMMENTS TO AUTHORS

An interesting and valuable review article on capsule endoscopy. Conclusion should be presented in an algorithm showing the role and value of the video capsule endoscopy. The evolution of the technique was presented with great details. Collaborations with endoscopic surgeons (i.e laparoendoscopic techniques) and importance of teamwork to improve effectiveness of minimally invasive surgery and role of gastroenterologist in this perspective can give message to everyone who interested in this topic. Adding some tables showing indications, bowel preparation, previous literature will improve the paper.

### COMMENTS TO AUTHORS

Dear authors, The review article by Bouchard et al. entitled "Video capsule endoscopy: perspectives of a revolutionary technique" is an interesting review article on not only small bowel capsule but also colon. This article is well written and well summarized. It must give WJG readers suggestive information. Major comment. In page 15, "Colon capsule and inflammatory bowel disease" section, Application of colon capsule endoscopy for ulcerative colitis is unconfirmed. As the authors mentioned, some reports showed good results, the other showed moderate sensitivities. These heterogeneities might be derived from type of used capsule such as first generation (CCE) or CCE-2. The authors should draw a paper using CCE-2 (Endoscopy. 2014 Jun;46(6):485-92.) , and discuss it. Minor comment In page 14, "First generation versus second generation" section, "OC" and "PCCE" should be spell out.

### COMMENTS TO AUTHORS

To the Authors, I read with interest your review article and I have some concerns and suggestions listed below: 1. Crohn's disease, third paragraph should be "...in patients with inflammatory bowel disease unclassified" instead of irritable bowel disease. There is no need for abbreviation (IBD) because it is not anymore used throughout the text. 2. Colon capsule first paragraph, first line: "As well as Polyps and Cancer Colorectal cancer.." should be rewritten. 3. The System, first paragraph, third line: "It has has..." -one has should be deleted. Please, pay attention to abbreviations: second generation colon capsule has been abbreviated at least twice! 4. Indications of colon capsule, last paragraph is a repetition of the first sentence, second paragraph from the system. And again, abbreviation for second generation of colon capsule! In addition, "A Prospective multicenter..." prospective should not be with capital letter! The same observation for Colonoscopy from Incomplete colonoscopy and Unwilling ...colonoscopy. 5. Outpatient setting: please, rewrite the first two sentences. Again and again there is abbreviation for colon capsule endoscopy! 6. Conclusion This section should be rewritten. I don't understand why you abbreviated SBCE while throughout the text it has been SBVCE, second-generation of the colon capsule (it has been already abbreviated several times), spelling celiac disease etc. The second paragraph, regarding future developments of endoscopic capsules (all, not only SB) should be the last paragraph. 7. Suggestions: The title of your article is "videocapsule endoscopy...". I suggest to add some information about esophageal capsule.
