COMMENTS TO AUTHORS

This paper is a comprehensive review of H. pylori infection among healthy, asymptomatic population in Iran and EMRO countries. Comments: 1. This review is indeed comprehensive and contains a lot of detailed information. Perhaps information contained in tables 2 and 3 can be summarized in few sentences/bullets in the text instead of extensive tables. 2. The paper would be significantly enhanced if the author could add general, short, synopsis information on antibiotic resistance and H. pylori treatment regimens used in Iran and EMRO countries. This would be appreciated by the Readers. 3) Ther paper requires linguistic and stylistic revisions

COMMENTS TO AUTHORS

The aim of the study is to show epidemiology of helicobacter pylori and its risk factors in IRAN and EMRO countries. I think it is a well prepared review article and is of high priority for publication in WJG after correcting type errors and english language editing.
