COMMENTS TO AUTHORS

To editor/authors: It is very interesting and valuable to be published. But there are some questions; 1. English writing should be modified. 2. Colon cancer lesion should be described in detail for example morphology and endoscopic diagnosis before operation. 3. Is the cancer lesion fit for treatment by endoscopic resection or/and laparoscopic resection? 4. Did the authors do freezing pathological biopsy? How about the result? 5. What is the possible etiology of nodular fasciitis?
