## COMMENTS TO AUTHORS

A unique case successfully treated with conservative management. Reference citation in the text should be according to the journal's policy<sup>[superscript]</sup>. Page 3: Line 9: Fig.1: please add A and B  
Page 4: Line 22: "fistula tract" may be altered to "fistulous tract"

## COMMENTS TO AUTHORS

This manuscript reports a case of pancreatic pseudocyst that was treated conservatively and healed through spontaneous drainage to the colon. Although the case may be important, several items seem lacking and presentation needs improvements. 1. What kind of antibiotics, from when to when did the authors used? This may be shown in the graph 1. 2. How (dose, interval, administration route, etc.) was the PEG solution used? 3. What was the nutritional care during fasting? How long was the patient fasted? These information should also be shown in the graph. 4. No evidence of gallstone is shown. How was gallstone pancreatitis diagnosed? 5. How was the fistula to right-side colon diagnosed from the CT shown in Figure 2? 5. The graph 1 should have horizontal axis with numerical tick marks. Other information of treatment and events can be also shown in this graph.
