<input type="checkbox"/> Grade E (Poor)		<input type="checkbox"/> Existed	<input type="checkbox"/> Major revision
		<input type="checkbox"/> No records	

COMMENTS TO AUTHORS

This is a rare disorder. Because of this, it is interesting. Minor revision should be done 1-Manuscript grammar should revise. 2-Only one radiologic image which can show intussusception is enough.

COMMENTS TO AUTHORS

In the current manuscript, the authors have described a case of Ileo colonic intussusception secondary to small bowel lipomatosis. I agree with the authors that it's a rare disease. However leo colonic intussusception secondary to small bowel lipomatosis is already described in literature long back. Hence, this report doesn't add anything to the existing literature.
