ESPS Peer-review Report

Name of Journal: World Journal of Gastroenterology

ESPS Manuscript NO: 6691

Title: Effects of Prokinetics Add-on PPI On Gastro-oesophageal Reflux Diseases: A Meta-analysis

Reviewer code: 00036874

Science editor: Wen, Ling-Ling

Date sent for review: 2013-10-28 11:04

Date reviewed: 2013-10-28 14:19

COMMENTS TO AUTHORS

The efficacy and safety of prokinetics plus PPI compared to PPI mono therapy with GERD still remains unclear. Therefore, you provide a meta-analysis in order to identify the efficacy and safety of these two kinds of treatments in GERD. You conclude combined therapy may partly improve the quality of patient's life (symptoms score change and reflux wave amplitude and wave duration) , but may have little significant advantage on symptoms or endoscopic response. I agree to your opinion saying that further randomized controlled studies compared prokinetic add on PPI and PPI alone with GERD are needed .
