## COMMENTS TO AUTHORS

This is an interesting manuscript. In this study, the authors analysis the key miRNAs in the cancer stem-like SP cells of gastric cancer cell line MKN-45. The study is well designed. The authors found that gastric cancer cell line MKN-45 contained SP cell by using FACS. Some minor revisions needed. 1 The abstract need to be re-written with aim, method, results, and conclusion. 2 The method and results are clear enough. But some minor language polishing needed. 3 The discussion is not so structured. It need to be edited. 4 References are updated. Good. 5 Tables and figure are clear.
