COMMENTS TO AUTHORS

This case report adds some information to the current literature. The case report and the discussion are well-written. They successfully managed a case of therapy-related acute myeloid leukemia This case report provides an important update on therapy-related acute myeloid leukemias and presents an interesting patients who after diagnosis including karyotype analysis and treatment entered complete remission. The report is well illustrated and the authors well summarized current literature. The report needs careful linguistic improvements: e.g. gastric patient , received a complete remission, etc needs rephrasing

COMMENTS TO AUTHORS

Thank you for submitting your paper. This manuscript is reported about a treatment-related AML after chemotherapy for advanced gastric cancer. This paper would help to remind gastroenterologists of some points noteworthy during and after chemotherapy.

COMMENTS TO AUTHORS

Dear authors, I thank you very much for giving the opportunity to review this manuscript. This case report adds some information to the current literature. The case report and the discussion are well-written. They successfully managed a case of therapy-related acute myeloid leukemias. However, they need to provide PubMed citation numbers to the reference list, e.g., PMID and DOI.
