COMMENTS TO AUTHORS

Is very interesting consideration and can open a discussion about this problem in all the world. In some countries the governmental law ask six months to abstinence but do not contemplate ALF due to alcoholic hepatitis

COMMENTS TO AUTHORS

I reviewed with pleasure the manuscript entitled "Severe ALD and liver transplantation" submitted to WJG as a Letter to the Editor concerning a paper by Testino et al. recently published in the same Journal. Unfortunately, this letter does not provide any new piece of relevant new information on this field. The authors did not publish any experience concerning this subject in the past. To me this letter is not worth publishing in the WJG.

COMMENTS TO AUTHORS

A very interesting paper. However, it needs some language polishing. 1) A clear conclusion/summary should be added at the end of this paper; 2) Consider a new title to reflect the point of this paper, such as "A 6-month abstinence for liver transplantation in severe ALD patients."

COMMENTS TO AUTHORS

I read the letter entitled "Transplantation for severe alcohol liver disease - time to change the paradigm of the 6-month "Rule" with interest. This is the novel and right idea. In this letter the author compare HCV related cirrhosis as the most common indication for liver transplant and ALD. As we know HCV is recurred after liver transplant in approximately 100% of the patients and many of them had HCC before transplant with high chance of recurrence. So I think this is a very good comparison. This letter has a new aspect in this regard.

COMMENTS TO AUTHORS

This manuscript mentioned an opinion as to legal access to LT for severe advanced ALD. This is one opinion, and acceptable as 'To The Editor'.
