## COMMENTS TO AUTHORS

Dear Author! I found this article titled "Lentiviral vector-mediated E2F-1 overexpression inhibits the growth of human gastric cancer MGC-803 cells in vivo" a very enjoyable and valuable work. I found just a few grammatical problems which must be corrected. 1. Page 5. ...at 37 □ 2. Page 6. ...from from 3. Page 8. .eight 4. Page 8-9 Some spaces are missing. 5. In the article both expressions "tumor" and "tumour" are used. It would be better to use just "tumour" expression. 6. The Material and Method part is too long. It would be more succesful to make it shorter and refer former literature from where this investigational method came. Of course it could be the authors own literature. After the corrections of this minor problems I offer this article for publication in the World Journal of Gastroenterology.
