COMMENTS TO AUTHORS

It is interesting study about the effect of PAP the on tumor. Some minor revision should be done: 1. Language should be extensive revised by native speakers or company. 2. The data imply the shorter hospital stay should be added as well as complications. 3. In the last paragraph of Introduction, the aim of "the outcome of the periampullary tumors" is not reported in the results. Please clarify your study objective. 4. Please explain the reason why choose 145 patients as control? 5. Does you buy the legal edition of SPPS or not? If not, please provide the evidence of authorized sheet?
