COMMENTS TO AUTHORS

The authors reviewed the update of intrahepatic cholestasis of pregnancy and titled the paper as "A 2014 UPDATE OF INTRAHEPATIC CHOLESTASIS OF PREGNANCY." Comments: 1. The entire review paper only contains ONE literature (#61) published in 2014 and 4 literature published in 2013. I don't understand how the authors could provide a 2014 update regarding the diagnosis and management of this challenging issue in ICP." The authors should review the most recent published literature and include them in this paper. I also would not recommend the use of "A 2014 update." 2. As the authors declared that the etiology of ICP is still unclear. Recent years some studies in genetic/mutational fields have been published. I would recommend the authors to include these with more detailed information in this review. 3. Minor points: In the abstract, please give the full name of UDCA for the 1st time use. Other grammatical errors should be corrected.
