		<input checked="" type="checkbox"/> No	

### COMMENTS TO AUTHORS

The authors present an interesting study to further investigate physiologic changes that occur in Hirschsprung's disease. - There are a significant number of grammar errors that would benefit from a thorough review. There are also a number of extra spaces before or after commas that would benefit from proofreading. In particular, the authors on several incidences use the term "have proved related..." This should be revised. Another in the introduction: "affected by different psychological state" should in fact say stateS..
