COMMENTS TO AUTHORS

This is an interesting manuscript about refractory diarrhea. Diarrheal neuroblastoma is quite rare which is not so easy to diagnose at the early period of such disease. In this article, the authors analysed six cases of diarrheal neuroblastoma, discuss the characters of the electrolyte imbalance, pathological features, the vasoactive intestinal peptide immunohistochemical staining results, also treatment and prognosis as well. 1 The manuscript need to be edited. Language polishing should be corrected. 2 The manuscript seems a research paper, but where is result? Please make revision. 3 Too little references. The authors should discuss some more references.

COMMENTS TO AUTHORS

This manuscript is very interesting. The structure of the manuscript is not very clear. The authors should reorganize the "PATIENT PRESENTATION" section. Do you intend to write a case report? or a research article? Please make revision. Some language polishing should be corrected.
