COMMENTS TO AUTHORS

Abuduxikuer and colleagues did a good work to report the case of 8-month-old Boy with Wilson Disease. In the report they stated that the weight of the body is below the normal during the period of 8-35 months. Please record these data.

COMMENTS TO AUTHORS

Abuduxikuer et al have reported a case about a 8 month old Chinese boy that has been diagnosed with Wilson disease. The case report is interesting and factual. I would like them to expand their discussion by explaining how over consumption of copper can induced Wilson disease (if known).
