<input type="checkbox"/> Grade E: Poor		<input type="checkbox"/> No records	<input type="checkbox"/> Major revision

COMMENTS TO AUTHORS

1. This is an interesting case report with CT images and pathological sections. 2. But, the authors should add characteristic signs of the portal and delayed contrast-enhanced CT scans, and these may be very helpful in its diagnosis. 3. Also, the authors should add more information about differential diagnosis in terms of diagnostic imaging and pathology through literature review or their experience.

COMMENTS TO AUTHORS

Although FNH is rare in children, there are dozens of such case reports in the literature. Therefore, this report is lack of novelty.
