COMMENTS TO AUTHORS

the description of the present case report can be useful for general endoscopic practice. However, there are several typos and sentence that are unclear. The following sentence is unclear: The endoclip was extensive use in GI bleeding were found to be inferior to electrocoagulation in stopping bleeding of canine mesenteric arteries of 1 mm and 2 mm in diameter[8]. Last sentence In summary, Clinicians must be alert to typhoid fever in patients with intestinal bleeding occurred from the ulcers in ileum and proximal colon. I suggest to rephrase the last sentence as follows: In summary, Clinicians should consider among the other causes also to typhoid fever in patients with intestinal bleeding occurred from the ulcers in ileum and proximal colon. References must be updated and improved. PUBMED: 29 hits for typhoid ulcers and bleeding
