COMMENTS TO AUTHORS

1. This study demonstrated that the AHF diet replicating high risk human dietary choices induced a chronic alcoholic pancreatitis in rats with histological features and developing glucose intolerance resembling clinical patients with chronic pancreatitis and type 3c diabetes mellitus. So, this paper has the novelty and innovation.
2. The title is accurately reflects the major topic and contents of the study.
3. The abstract is well organized, providing a clear delineation of the research background, objectives, materials and methods, results and conclusions.
4. The methods used are innovative. The statistical methods used are appropriate.
5. The results provide sufficient experimental evidence or data to draw firm scientific conclusions.
6. The discussion is well organized, and the systematic theoretical analyses and valuable conclusions are provided.
7. The references are appropriate, relevant, and updated.
8. The figures reflect the major findings of the study.
