COMMENTS TO AUTHORS

Well written, valuable data. Please see my minor edits attached and please speculate in the discussion on why the association of TOPAb and CXCL10 was observed with on-treatment TD.

COMMENTS TO AUTHORS

The manuscript reinforces the suggestion that HCV infected patients should be screened to the presence of thyroid dysfunction markers before undergo IFN-a/ribavirin treatment, since such treatment may increase prevalence of TD. However, some conclusions need to be correctly built in face of the data presented.

COMMENTS TO AUTHORS

We read with interest the manuscript entitled "Thyroid Dysfunction in Chineses HCV patients: the Role of TPOAb and CXCL10". In our opinion the language and the content of the manuscript need major revisions.
