### COMMENTS TO AUTHORS

Coagulopathy of liver disease: lack of a tool for assessment This is an interesting review and well written on coagulopathy of liver disease. The review will be suitable for publication after authors complete some suggestions to improve it in order to make b understandable the manuscript: 1. Some recent and interesting references are missing: Muci?o-Bermejo J, Carrillo-Esper R, Méndez-Sánchez N, Uribe M Thrombosis and hemorrhage in the critically ill cirrhotic patients: five years retrospective prevalence study. Ann Hepatol. 2015 Jan-Feb;14(1):93-8. Manzano-Robleda Mdel C, Barranco-Fragoso B, Uribe M, Méndez-Sánchez N. Portal vein thrombosis: what is new? Ann Hepatol. 2015 Jan-Feb;14(1):20-7. 2. Authors need to rewrite the conclusion section because in the present form it is incomplete and it does not reflects the current knowledge on which are and which are not good to assess the coagulopathy in chronic liver diseases. 3. A table with different tools to assess the coagulopathy in chronic liver diseases is mandatory
