COMMENTS TO AUTHORS

Comments on manuscript No 17643 Title: Laparoscopy-assisted distal gastrectomy for advanced gastric cancer with situs inversus totalis: a case report The authors have described the laparoscopic surgery for gastric malignancy with situs inversus totalis which is a rarity and therefore it should be reported However authors need to make certain corrections; In the literature, up till now five cases have been reported (and not four) as written in the reference No 4 of this manuscript. There are certain grammatical errors and some language polishing by language editor is required before its publication in World Journal of Gastroenterology
