### COMMENTS TO AUTHORS

Dear authors: The article "The use of entecavir in HBV reactivation of a patient with non-Hodgkin's lymphoma" shows some additional comments on this case report by Lui et al. I agree with the opinions of him that the resolution of HBV reactivation might be achieved with lamivudine instead of entecavir or also be observed when entecavir was used at a dose of 0.5 mg. These comments may provide practical value for antiviral prophylaxis against hepatitis B. Thank you and best regards. Zhijun Su
