## COMMENTS TO AUTHORS

SPHINCTER ULTRASOUND LESIONS AFTER TRANSANAL ENDOSCOPIC SURGERY (TEO/TEM)

Overall this is an interest study. I have a few comments. Some grammatical correction is needed – and one cases presented lower anal and one case presented lower anal the circumference was between 55 the circumference was between 55 and the increase in IAS width has rarely reported and the increase in IAS width has rarely been reported Can there be a statistical table as you mention significances but they do not stand out. References appear to be irregular for example Eur J Surg Oncol. 2000; 26: 751-7 Versus Ultrasound Obstet Gynecol. 2003 Dec;22(6):609-15

## COMMENTS TO AUTHORS

Perhaps you present one of the most important issues for patients after transanal endoscopic surgery  
I congratulate you for your providing to literature.
