ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Gastroenterology
ESPS manuscript NO: 19630
Title: Clinical significance of Golgi phosphorylation protein 3 expression in colorectal cancer
Reviewer's code: 02554014
Reviewer's country: Taiwan
Science editor: Jing Yu
Date sent for review: 2015-05-15 20:38
Date reviewed: 2015-06-18 23:51

COMMENTS TO AUTHORS

The manuscript by Guo, et al. aimed to investigate the effect of golgi phosphorylation protein 3 (GOLPH3) expression on cell apoptosis and angiogenesis in human colorectal cancer (CRC) tissues, and to further explore the relationship of GOLPH3 expression with prognosis of CRC. In general, the manuscript is clearly written and coherent. The authors demonstrate the urgency for discovery of novel molecular markers for CRC; and their work strives to address this need. Notably, the role of GOLPH3 in cancer has only been recognized recently, and there is need to further explore how its expression affects the behavior of different types of cancer, including CRC.
