COMMENTS TO AUTHORS

1 As this is an up-date, more fields of medical information must be covered, including pathology, immunity, infection, cell science. 2 The etiology of the disease has to be mentioned. Infection may play a role in the initiation of the disease, as do immunity and heredity. 3 When monoclonal anti-body is used for treatment, brief introduction of molecular medicine is suggested. 4 The difference in clinical manifestation and management between perianal fistula of this disease and that of other diseases need to be described. 5 Please correct typo and edit errors. Grammatical and punctuation errors exist.

COMMENTS TO AUTHORS

The work is written in a correct way: it is a timely examination of the management of perianal fistulas in patients with Crohn's disease. The work is well written, with good use of the English language, well documented.
