### COMMENTS TO AUTHORS

You have provided us a good experience of differential diagnoses of GERD. I think if the description is more vivid, it will be better.

### COMMENTS TO AUTHORS

The structure of the paper is a bit misleading: chapters on "Case report" and "Comments" are partially repeating each other. There are no details provided about the treatment of GERD neither about associated diseases/treatments and diets- all these may be important in describing belching. The references in Chinese are not helpful for international readership, these should be replaced by international ones. There are 2 papers of importance while discussing the topic: Gislason T et al 2002 and Leal R et al 2014- so please analyse the case in the frame of evidence from literature more broadly. The language needs editing.

### COMMENTS TO AUTHORS

This case report described a male asthma patient who complained of belching, abdominal distention, regurgitation which is resembled with that of GERD. It will shed light on the diagnosis and differential diagnosis between asthma and GEED for the physicians. The detailed data of the patient was presented and the discussion was objective. Some sentences needs to be polished by an English editor.

### COMMENTS TO AUTHORS

Is a good paper of interest for GI physician. Maybe the title could be better.
